Strategy

Every question about the portfolio, already answered — just find it.

KATHLEEN & JAMIE

Strategy Explorer — pitch deck

THE GOAL

See the whole portfolio — not just your slice of it.

Straight from the team's own whiteboard — what everyone actually wants out of this.

1

Look into each other's work

See what other strategies and teams are actually doing, without asking around.

2

Connect existing work to what's next

Line it up against the new strategy — not just the one it was funded under.

3

See where it's disconnected

Spot the work that doesn't connect to anything, on purpose or otherwise.

4

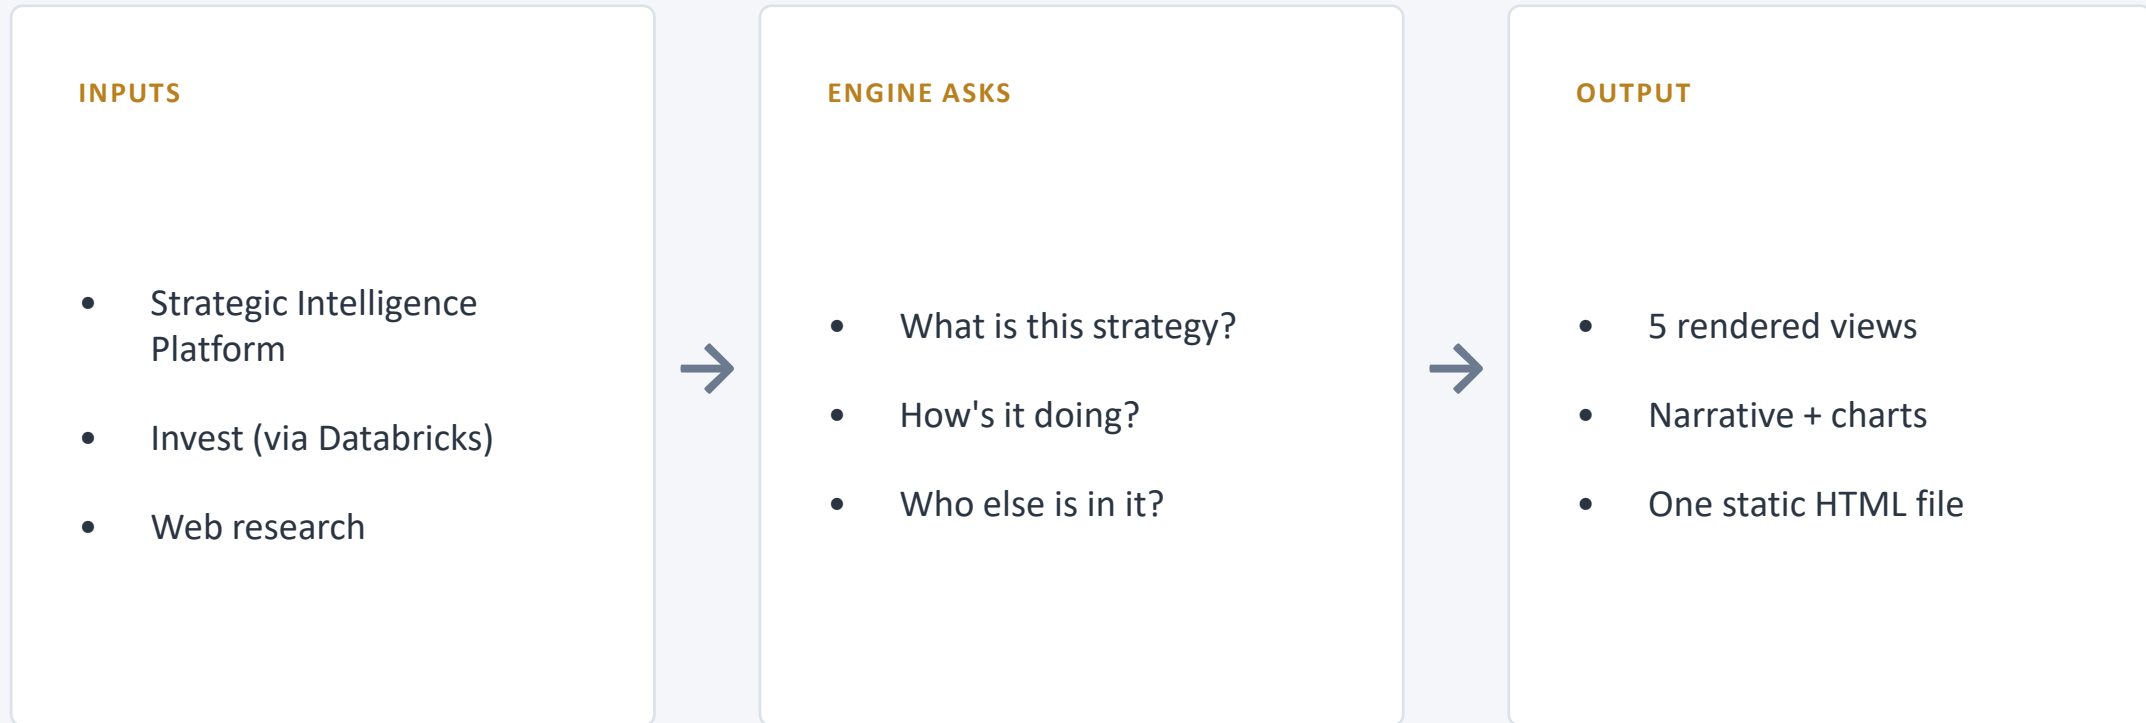

Watch it change over time

Structure, budget, and ratings — not just a snapshot of where things stand today.

The hardest one to see without help

HOW WE DO IT

Three real sources. One engine. Five views.

Nobody types a question in. The engine runs on a schedule and renders itself into one file — opens in a browser, attaches to an email. No login. No hosting.

AN EXAMPLE

Ask a real question. Get a real answer.

SOMEONE ASKS

“Where does Math Pathways show up in A&SI — and what are the outcomes and dollars?”

WHERE IT SITS

One BoW, one owner

“Develop Modernized Math Pathways” sits under A&SI → Pathways Delivery. A&SI manages and funds it alone — no co-funding strategy.

OUTCOMES

Slightly Below Expectations

Current impact & execution score. Goal: more states committed to modernized math pathways from high school through college, with better data and conditions to support it.

DOLLARS

\$4.0M received, FY2025

\$26.9M approved / \$24.1M paid lifetime, across 17 investments (8 active, 9 closed).
